Terri,

I looked at the some of the reports attached to your email, and here is a map in the report -- it does appear that the current Trinseo plant could have been part of the Rohm & Haas site at one time. But LCRD would be the best source to get a definitive answer to the reporter's question.

Terri,

You will have to go to LCRD for information on the Corrective Action Plan. ECAD has no involvement in Corrective Action. Luis Pizarro may be your best starting point.

Regarding whether Trinseo is operating on the Rohm & Haas site. The two facilities have two different Lat and Long and two different addresses. Trinseo is at 100 Route 413 and Rohm & Haas is at 200 Route 413. I have not idea if at one time Rohm & Haas operated on the now Trinseo facility. LCRD may be able to answer that given their involvement in the Corrective Action with Rohm & Haas.

Thanks,

Joan

Subject: FW: Arkema / Trinseo Plant

The reporter is asking if this Trinseo Plant was once the location of a Rohm and Haas facility?

First, I wanted to more about this corrective action plan: [https://www.epa.gov/sites/default/files/2020-07/documents/rohm and haas bristol fdrtc for parcels -wwta-ma with sb.pdf](https://www.epa.gov/sites/default/files/2020-07/documents/rohm_and_haas_bristol_fdrtc_for_parcel -wwta-ma_with_sb.pdf)

Then, I was a little confused because I saw two facility profiles for the site that both seem to be related to the former Rohm & Haas plant, now the Trinseo plant.

Here's one: <https://echo.epa.gov/detailed-facility-report?fid=110038727562>

Here's the other: <https://echo.epa.gov/detailed-facility-report?fid=110000336191>

I had some informational Qs about these, but I also wanted to confirm if both were related to the Trinseo plant?

Let me know what you think

Yeah I mean the plan describes some kind of remediation work that was meant to be completed in 2021. Did that happen?

Is there any other relevant info for this site? What is the second facility page I mentioned? Is that the same site or no?

Here's a link to information about the facility. <https://echo.epa.gov/detailed-facility-report?fid=110000336191>

Do you still want to ask about the corrective action plan?

Hi Ryan,

Are you looking at an online EPA report? Let me know specifically what you are looking at so that I can bring in the right person.

Hey Terri,

I'm a reporter at the Inquirer. I'm looking into some EPA reports on the site that was responsible for the recent chemical spill into the Delaware River. Do you have a second to go over some of this information with me? I just want to make sure I'm reading it correctly.
